**DETAILED ACTION**

***Response to Amendment***

1. This office action is in response to the amendment submitted on 19 October 2005. Claims 2-17, 27 and 31 are currently pending.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2-10, 12-17, 27 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

NOTE: Claim 31 is now included in this rejection as applicant has shown that the claim is supported by the specification as originally filed.

Applicant argues that the claims are enabled as one of ordinary skill in the art would know how to make and/or use the invention without undue experimentation and that the size of roughness, average port diameter and score marks was known.

To these arguments the examiner respectfully disagrees. Applicant's arguments are without merit since the information has not been included in the present specification. It is not clear as to who one of ordinary skill in the art is supposed to be.

Is applicant trying to say that the level of skill is one of ordinary skill in the braking art or in the lacquer art? The fact remains that this composition can be used in other venues besides braking systems as it is merely drawn to a corrosion protective lacquer (it is not limited to a composition specifically for protecting braking surfaces) and therefore the person of skill in the art other than the art of braking surfaces would require a great deal of experimentation to ascertain the grain size required. Applicant's arguments are based on unrecited comparisons. The specification provides no guidance as to the grain size of the protective substances used that are within the scope of the invention.

Applicant is claiming a composition by properties based on its ultimate intended use (as in braking systems) which renders the claims not enabled as the exact grain size of the composition would depend on the average grain size of the particular braking system utilized and would require undue experimentation to determine the scope of the claim.

One cannot determine what size is within the scope of the claim and therefore one cannot ascertain what grain size would infringe on the instant claim and accordingly an accurate comparison of the prior art with the instant claims cannot be performed.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2-10, 12-17, 27 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the independent claims it is unclear as to the grain size encompassed by the

phrase "substantially equal to at least one of a maximum roughness, an average pore diameter and an average size of score marks".

Applicant argues that the claims are not indefinite as the size of roughness, average pore diameter and average score marks on a braking surface of a brake disk and brake drum was known to one of ordinary skill in the art at the time of the filing of the application.

To this argument the examiner respectfully disagrees. The claim is drawn to a composition and is not limited to a braking surface composition and therefore one cannot ascertain the size encompassed by the claims. Applicant should also refer to the comments found in the 112 1<sup>st</sup> paragraph rejection that appear above for a more detailed discussion.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
